

Please rewrite the paragraph from page 6, line 33 to page 7, line 9 as follows:

B<sup>2</sup>  
The above oxide may be an oxide of a single element or a composite oxide of two or more elements. Examples of the inorganic oxide include silicon oxide, aluminum oxide, tin oxide, antimony oxide, tantalum oxide, cerium oxide, lanthanum oxide, iron oxide, zinc oxide, tungsten oxide, zirconium oxide, indium oxide, titanium oxide, composite oxide of titanium oxide/zirconium oxide and composite oxide of titanium oxide/zirconium oxide/silicon oxide. The composite oxide preferably contains at least 50 wt% of titanium oxide. The inorganic oxide preferably has a particle diameter of 1 to 100 nm.

Please rewrite the paragraph from page 12, line 32 to page 13, line 12 as follows:

B<sup>3</sup>  
Examples of the organic silicon compound include compounds represented by the following formulas (3), (4), (5) and (6).

wherein a plurality of R<sup>6</sup>'s may be the same or different and each an organic group having an alkyl group, phenyl group, vinyl group, methacryloxy group, mercapto group, amino group or epoxy group, and X is a hydrolyzable group.

wherein R<sup>6</sup> and X are as defined in the above formula (3), with the proviso that a plurality of X's may be the same or different.

wherein R<sup>6</sup> and X are as defined in the above formula (3).

wherein X is as defined in the above formula (3).
